Coffee tables with a difference - Reznig® by Planq.

The inspiring Reznig® Veneer is made of textile waste, such as old denim, army clothing, suits and uniform. But also from biobased fibres, such as flax, hemp, and jute coffee bags. The fibres are first shredded into small pieces and then carded into felt.

Featured opposite is a nest of coffee tables where the smaller of the two tables has White Denim applied.

This works beautifully alongside the larger Oak and Oak veneer table. The perfect partner to any of our sofas.

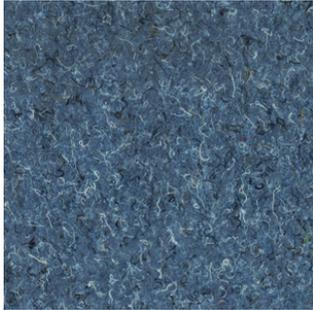

We can design and manufacture your vision to your required specifications.
