Peace in a Pod

We've designed our pods to ensure the best user experience possible by providing a quiet environment for those inside while also keeping the sound in.

Don't worry though, users will still be able to hear the important ring of an alarm from inside the pod.

The Facts

We've had our Oasis Atmos pods independently tested, so we'll let the result speak for themselves.

Speech level reduction according to ISO 23351-1: 26.3 D_{SA} Class B

The Knowledge

Speech level reduction measures how much an acoustic pod reduces speech-related noise. For consumers, a higher speech level reduction means a quieter and more private environment inside the pod.

Kelvin (K) relates to the colour temperature of light, while Lux (lx) measures luminance, indicating the brightness.

CFM (Cubic Feet per Minute) measures airflow volume, it is important for effective air changes to maintain good air quality and comfort.

Airflow and the airflow gap is essential for maintaining a comfortable and healthy environment within the acoustic pod, helping to dissipate any heat generated within the pod and ensures that air circulation is sufficient for occupants.

Oasis Atmos

Duo Pod Cloud

"Pods designed with health and wellbeing in mind, with acoustic brilliance."

Duo Pod Cloud

Why choose Oasis Atmos?

Functional
Equipped with everything you would need to provide the best user experience

Compact
Creates private spaces in a compact form

Agile
Optional castors provide the ability to move around the office freely

Private
Allowing employees to have the privacy needed in simple way

Oasis Atmos is the perfect environment for...

Confidential meetings

Quiet working

Creativity

Duo Pod Cloud

Peace in a Pod

We've designed our pods to ensure the best user experience possible by providing a quiet environment for those inside while also keeping the sound in.

Don't worry though, users will still be able to hear the important ring of an alarm from inside the pod.

The Facts

We've had our Oasis Atmos pods independently tested, so we'll let the result speak for themselves.

Speech level reduction according to ISO 23351-1: 25.1 D_{SA} Class B

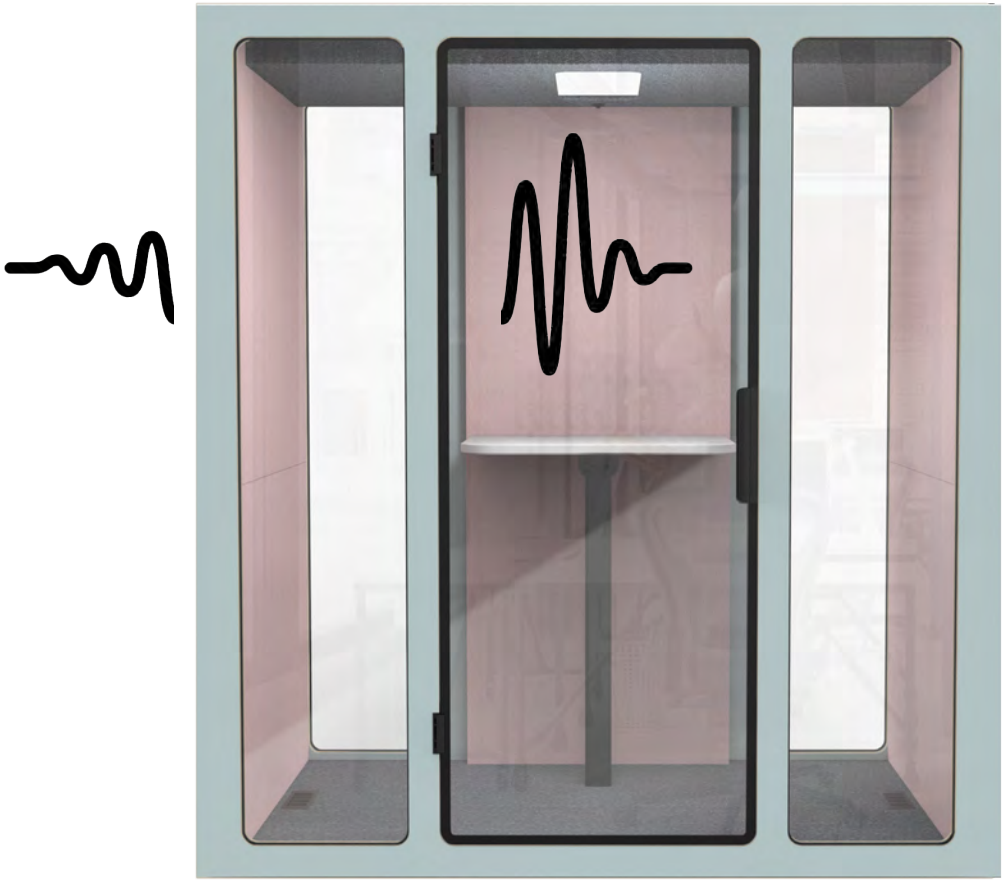
The Knowledge

Speech level reduction measures how much an acoustic pod reduces speech-related noise. For consumers, a higher speech level reduction means a quieter and more private environment inside the pod.

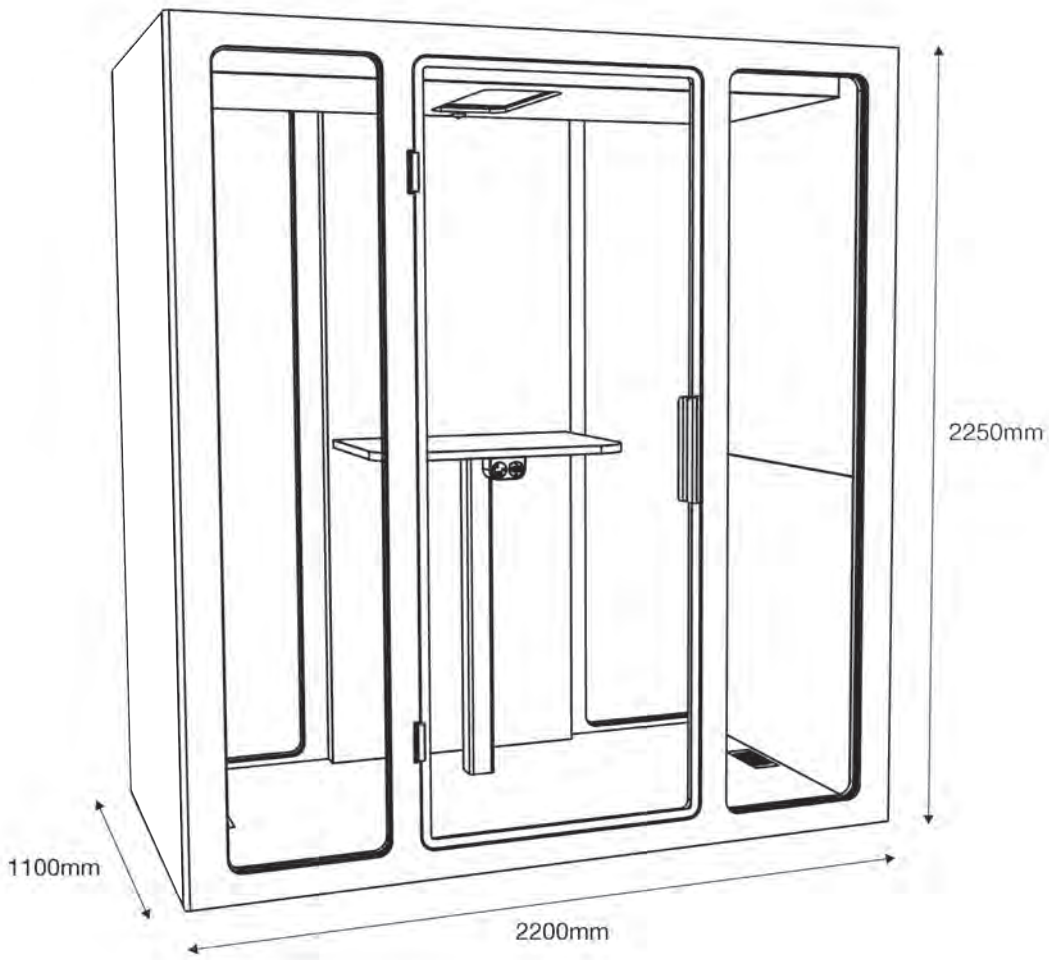
Kelvin (K) relates to the colour temperature of light, while Lux (lx) measures luminance, indicating the brightness.

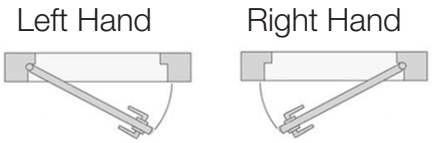
CFM (Cubic Feet per Minute) measures airflow volume, it is important for effective air changes to maintain good air quality and comfort.

Airflow and the airflow gap is essential for maintaining a comfortable and healthy environment within the acoustic pod, helping to dissipate any heat generated within the pod and ensures that air circulation is sufficient for occupants.



Duo Pod Cloud





Features

Output AC	240 VAC, 3.15 Amp, 50-60 Hz
Acoustics	25.1 D_{SA}
Lighting	3000K 370<600 Lux Table (730mm<1050mm)
Airflow	273.6m3/h (76. l/s) (161 CFM)
Air Change	69.4per/h
Ventilation	Air flow requires 200mm gap above pod
Interior	1972x992x2020mm (w,d,h)
Exterior	2200x1100x2250mm (w,d,h)
Weight	503kg
Doorway	817mm

Oasis Atmos

Team Pod XL View

"Pods designed with health and wellbeing in mind, with acoustic brilliance."

Team Pod XL View

Why choose Oasis Atmos?

Functional
Equipped with everything you would need to provide the best user experience

Compact
Creates private spaces in a compact form

Agile
Optional castors provide the ability to move around the office freely

Private
Allowing employees to have the privacy needed in simple way

Oasis Atmos is the perfect environment for...

Confidential meetings

Quiet working

Creativity

Team Pod XL View

Peace in a Pod

We've designed our pods to ensure the best user experience possible by providing a quiet environment for those inside while also keeping the sound in.

Don't worry though, users will still be able to hear the important ring of an alarm from inside the pod.

The Facts

We've had our Oasis Atmos pods independently tested, so we'll let the result speak for themselves.

Speech level reduction according to ISO 23351-1: TBC

The Knowledge

Speech level reduction measures how much an acoustic pod reduces speech-related noise. For consumers, a higher speech level reduction means a quieter and more private environment inside the pod.

Kelvin (K) relates to the colour temperature of light, while Lux (lx) measures luminance, indicating the brightness.

CFM (Cubic Feet per Minute) measures airflow volume, it is important for effective air changes to maintain good air quality and comfort.

Airflow and the airflow gap is essential for maintaining a comfortable and healthy environment within the acoustic pod, helping to dissipate any heat generated within the pod and ensures that air circulation is sufficient for occupants.

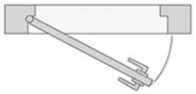
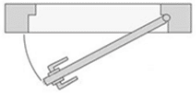
Left Hand



Right Hand



Features

Output AC	240 VAC, 3.15 Amp, 50-60 Hz
Acoustics	TBC
Lighting	3000K 370<600 Lux Table (730mm<1050mm)
Airflow	273.6m3/h (76. l/s) (161 CFM)
Air Change	44.7per/h
Ventilation	Air flow requires 200mm gap above pod
Interior	1972x1542x2020mm(w,d,h)
Exterior	2200x1650x2250mm (w,d,h)
Weight	993kg
Doorway	817mm

Standard Specifications

- Right handed door with pull handle
- Standard finish upholstered end panels
- Upholstered internal
